

Cellular PVC Plank 4" V Groove

TECHNICAL DATA SHEET

Detail A

1. CELLULAR PVC

Strong and sturdy 1/4 inch thick cellular pvc planks. The microbubble-infused polymer composite creates a rigid plank that can be worked as easily as real wood, resisting against wind, hail, impacts and scratches.

Pre-pierced holes spaced 4 " apart, to allow for fast and easy screw insertion.

All sizes of profiles interlock with each other with simple tongue and groove mating. (Detail A)

Installation can be made both vertically and horizontally.

2. HD PRINTING

High-definition digital inkjet printing (± 1 mil. thick) is used to create photographic reproductions of a wide range of textures and outstanding color variations.

3. UV BARRIER

A protective clear coat ($\pm 1,2$ mil. thick) is applied to provide long-term protection against UV rays and fading.

Scale : 1:1
