

Cellular PVC Plank Decking

TECHNICAL DATA SHEET

1. CELLULAR PVC

Strong and sturdy cellular pvc decking plank offering great resistance to wind, hail, impacts and scratches.

Decking planks can be used on every type of structure, using simple woodworking tools and technique.

Thanks to the specially designed D-Clip, installation is easy, leaving no visible screws or caps. Gap distance between every plank is consistent at 0,25 inches.

2. HD PRINTING

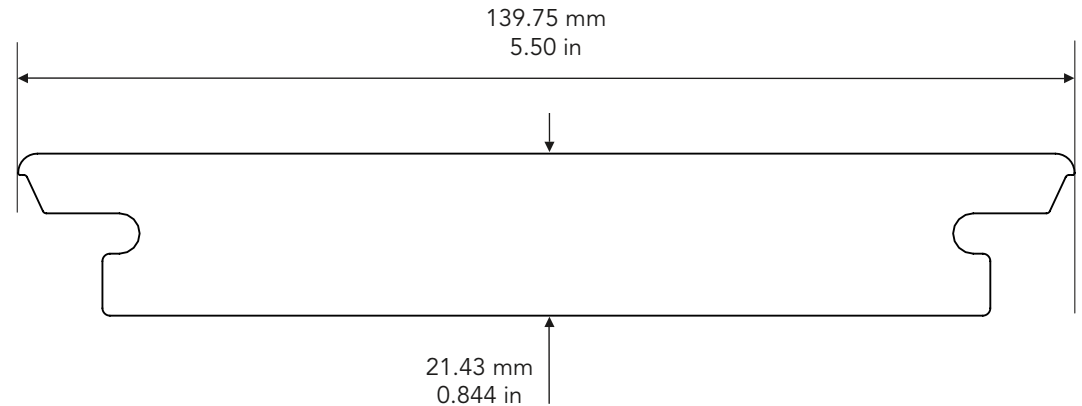

High-definition digital inkjet printing (± 1 mil. thick) is used to create photographic reproductions of a wide range of textures and outstanding color variations.

3. UV BARRIER

A protective clear coat ($\pm 1,2$ mil. thick) is applied to provide long-term protection against UV rays and fading.

4. TOP-COAT

The final layer is a special transparent aluminum-oxide UV top-coat ($\pm 1,0$ mil. thick), with a light granular texture, offering optimal resistance to abrasion and slip.

Scale : 1:1
