

Cellular PVC Decking 5.5 inch Plank

TECHNICAL DATA SHEET

1. CELLULAR PVC

Microbubble-infused polymer composite 21.43 mm (0.844 in) thick. A rigid and durable material with superior hail, impact, and scratch resistance, that can be worked as easily as real wood.

Decking planks can be used on every type of structure, using simple woodworking tools and technique.

Thanks to the specially designed D-Clip, installation is easy, leaving no visible screws or caps. Gap distance between every plank is consistent at 0.25 inches (6.35 mm).

2. HD PRINTING

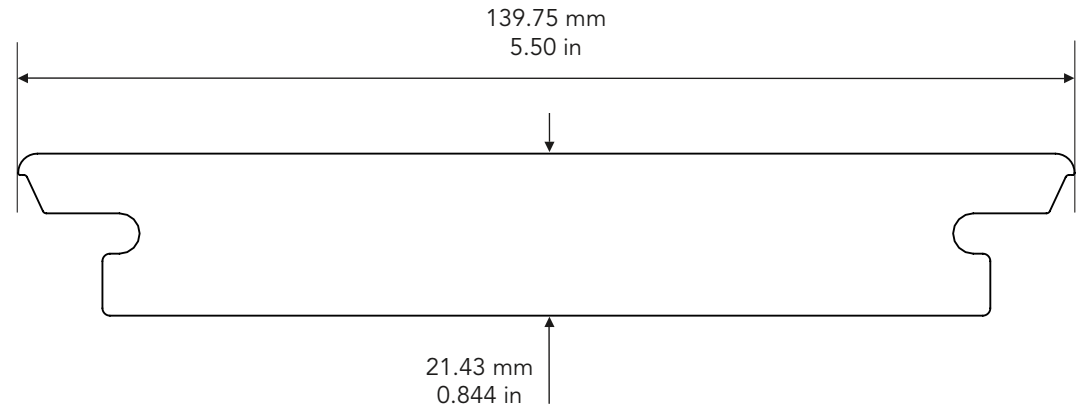

High-definition digital inkjet print ± 1 mil (25.4 μm) thick of a wide range of textures with outstanding color variations.

3. TOP-COAT

Granular slip and abrasion resistance through a superior transparent UV coating.

4. Z-CLEAR

A protective clear coat ± 1.2 mils (30.48 μm) thick is applied to provide long-term protection against fading.

Tests & Certifications*

- . ASTM D256 - Impact Resistance
- . ASTM D638 - Tensile Properties Testing
- . ASTM D790 - Flexural Properties Testing
- . ASTM G155 - 2000h UV Resistance
- . ASTM D3359 - Adhesion Testing
- . ASTM D4060 - Abrasion Resistance
