2" x 8" Battens in PERUVIAN WALNUT - Charcoal

Dizal's new aluminum battens combine ease of use and spectacular performance. The product is made to allow architects and designers the possibility of creating unlimited architectural shapes. Installed on virtually any surface, whether it be horizontal or vertical on a wall, hanging from a ceiling, used as boards for privacy screens, and more, the battens can be used like any other common wood plank.

Installation is simple and requires no special tools. Depending on the requirements, the battens can be pierced and/or threaded. Various brackets can be fastened to any face and in any direction. Hundreds of possible fastening solutions are available on the market from specialized manufacturers. See installation guide for examples.

Dizal does not supply fastening components.
