PERFORMANCE EVALUATION OF VARIOUS SCREW FASTENERS FOR PULL-OUT STRENGTH IN ACCORDANCE WITH MODIFIED ASTM D1037 TEST METHOD

DIZAL A Report to: 4000 Jean-Marchand, Local 108 Québec, QC G2C 1Y6 Attention: Joël Côté-Cright **Designer Industriel** Telephone: +1 (418) 915-9400 Ext. 309 Email: jcote@dizal.com Proposal No .: 20-006-164856 Report No .: 20-06-P0063 3 Pages, 1 Appendix Date: May 21, 2020

Page 2 of 3 Report No. 20-06-P0063

1.0 INTRODUCTION

At the request of *DIZAL*, Element Materials Technology was retained to evaluate the performance of various screw fasteners in general accordance with ASTM D1037, Section 14 – Nail Withdrawal.

Upon receipt, the samples were assigned the following Element Sample Numbers:

| Client Sample Identification | Sample Photo | Element Sample No. |
|---|--|--------------------|
| DIZAL-SC2-A, B and C #8 x 2"- Self-drilling P#20-006-164856 | PUZAL-SCF-A M-S. dr. Marken M. dr. Schartmann M. | 20-06-P0063-A |
| DIZAL-SC1-A, B and C #8 x 1"- Self-drilling P#20-006-164856 | BALL SOLA HALSOLA H | 20-06-P0063-B |

2.0 PROCEDURE

Testing was performed with the following test method:

| | Test Description | | Test Method |
|---|-------------------------|---|--|
| Standard Test Methods for Evaluating Properties of Wood- Base Fiber and Particle Panel Materials | | ASTM D1037 (modified) – Section 14 | |
| Ν | o. of Specimens Tested: | Three (3) for each fastener configu | ration |
| Ρ | re-Conditioning: | >40 hours at 23± 2°C; 50 ± 5% | |
| E | quipment: | Instron Load Frame, 25 kN Load Cell, Digital Calipers, Environmental Controller, | MII# A04407 MII# A08308 MII# B10644 MII# B14944 |
| С | rosshead Rate: | 3 mm/min | |
| Т | est Conditions: | $23 \pm 2^{\circ}$ C; 50 $\pm 5\%$ Relative Humidity | |
| Т | est Date: | 2020-05-11 | |

Page 3 of 3 Report No. 20-06-P0063

3.0 RESULTS

A summary of the fastener pull-out testing is presented in Table 1. Detailed test results can be found in Appendix A. SI units are the primary units of measure.

| Table 1 – Summary of Fastener Pull-Out ResultsApplicable Standard: ASTM D1037 (modified) – Section 14Element Sample No.: 20-06-P0063 | | | |
|--|----------------|------|------|
| Sample Description Sample Number Pull-Out Force, N Average Pull-Out Force, N Sample Number Pull-Out Force, N Pull-Out Force, N | | | |
| DIZAL-SC2-A | 20-06-P0063-A1 | 5105 | |
| DIZAL-SC2-B | 19-06-P0175-A2 | 4346 | 5121 |
| DIZAL-SC2-C | 19-06-P0175-A3 | 5910 | |
| DIZAL-SC1-A | 19-06-P0175-B1 | 5158 | |

1.0 INTRODUCTION

At the request of *DIZAL*, Element Materials Technology was retained to evaluate the performance of various screw fasteners with ACM panels in general accordance with ASTM D1037, *Section 14 – Nail Withdrawal*.

The various screw fasteners and ACM panels were prepared by DIZAL and shipped to Element Toronto for testing. No special sampling procedures were used by Element Toronto to select the specimens.

Upon receipt, the samples were assigned the following Element Sample Numbers:

| Client Sample Identification | Element Sample No. |
|------------------------------|--------------------|
| DIZAL-01-ALU-A TO C | |
| #8 x 1-1/2" | 19-06-P0175-A1 |

|-----|--|---|--|--|--|
| 4.0 | CONCLUSION | | | | |
| | La résistance à l'arrachement des échantillons soumis par <i>DIZAL</i> a été évaluée comme décrit dans le présent rapport. Un résumé des résultats des essais se trouve dans le tableau 1; de plus amples détails figurent à l'annexe A. | | | | |
