

HPD UNIQUE IDENTIFIER: 2337225728

CLASSIFICATION: 07 46 16 Aluminum Siding

PRODUCT DESCRIPTION: This HPD covers digitally printed aluminum siding from Maibec. Maibec's technology prints authentic textures of various materials from an exclusive high definition digital inkjet printing process. More specifically, this HPD covers the following aluminum siding panels: 3" V Groove Panel (Profile V), 4" V Groove Panel (Profile V), 4" Flat Panel (Profile F), 6" V Groove Panel (Profile V), 6" Channel Panel (Profile C), 6" Flat Panel (Profile F), 8" Flat Panel (Profile F).

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

INVENTORY AND SCREENING NOTES:

HPD prepared using a Nested Materials Inventory with a product threshold at 1000 ppm. The content inventory includes average to encompass all the aluminium siding style. Maibec aluminium siding contain materials without Special Conditions (polymers) as per the HPDC. Guidelines for reporting polymers are still under development by HPDC and the manufacturers will update the HPD accordingly once these guidelines get published. The product contains alternative components. Substances present in Maibec aluminium siding, as well as known residuals and impurities, have been disclosed at 1000 ppm. More details about how residuals and impurities were considered available in the appropriate sections.

*Form-Specific Hazard: This substance's GreenScreen Benchmark or List Translator score and the applicable hazards are related to particulate inhalation, which is expected to occur only during manufacture, installation, maintenance, or demolition, due to activities such as sawing, sanding, grinding, or intensive cleaning. For this reason, this score is intentionally omitted from the "Contents highest concern" line above. See HPDC's Special Conditions policy for more information.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

INKS

#: 0.1200 - 0.3000

PRODUCT THRESHOLD: 1000 ppm RESIDUALS AND IMPURITIES EVALUATION COMPLETED: Yes MATERIAL TYPE: Polymeric Material

RESIDUALS AND IMPURITIES NOTES: Based on the supplier SDS, residuals and impurities are below the reporting threshold.

OTHER MATERIAL NOTES: Inkjet inks used for creating various textures and print. The inventory contains 6 types of ink products: primary colors (magenta, cyan, yellow), black and clear coating. The composition is very similar among all 6 products, therefore only one material has been created. Weight percentage represents a range because this HPD covers multiple products style.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and
